

Coming soon to a highway near you:

(Already on the Tobin bridge, the two tunnels, and the Mass Pike.)

"All Electronic Tolling System" (AETS) on Mass Pike (photo fair use)*

Unless you stop it NOW!!!

It's up to "We The People" to make our Government keep its Broken Promises!

Sign The Petition, Today!!!

When technology is a tool, there is freedom, when technology rules us, there is tyranny!!!

* Note: Photo bubbles depict currently implemented and technologically possible examples.

The state promised the Mass Pike tolls were only temporary, but has kept renegeing on its word to end them. On Friday October 28, 2016, all electronic tolling went into effect, and legislatures have since made known their desire to expand tolling to other highways across the state. **Enough IS ENOUGH!!!** To stop this, we need **100,000 signatures** by **November 22nd, 2017** to get this on the 2018 ballot. Please help us to repeal this "**Abuse of our trust!**"

If you are a registered Massachusetts voter,

Please sign the petition.

Doing your part. This is how our republic is supposed to work. Thank you. 😊
